EDUCATION

Arizona State University, Tempe, Arizona, USA **Expected Dec 2027**
Master of Science (MS), Computer Science **GPA: 4.0/4.0**
Coursework: Data Processing at Scale, Statistical Machine Learning, Data Mining, Semantic Web Mining

K. J. Somaiya Institute of Technology, Mumbai, India **Jul 2020 - May 2024**
Bachelor of Technology (B.Tech), Artificial Intelligence & Data Science Engineering **GPA: 3.6/4.0**
Relevant Coursework: Software Engineering, Operating Systems, Database Management Systems, Data Structures, Analysis of Algorithms, Artificial Intelligence, Machine Learning, Deep Learning

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, TypeScript, JavaScript, Java
- **AI & ML:** LLMs, Prompt Engineering, Hugging Face Transformers, Model Evaluation, Claude Vision API
- **Web & APIs:** React, Next.js, REST APIs, API Integration, Structured JSON Outputs
- **Data & Databases:** PostgreSQL, MySQL, Supabase, pandas, NumPy, Data Loading, Data Validation
- **Software Engineering:** Object-Oriented Programming, Unit Testing, Functional Testing, Debugging, Technical Documentation
- **Tools & Platforms:** Git, GitHub, Docker, Linux, Jupyter Notebook, Google Colab, AI-Assisted Development, Streamlit, ChatGPT Codex, Claude Code

PROJECTS

LeftoverLab, iOS Kitchen Assistant | Swift, SwiftUI, SwiftData | *GitHub* **Jun 2026**
- Built an iOS kitchen assistant using SwiftUI and SwiftData, generating personalized meal recommendations from an **82-recipe catalog** while keeping user data on-device.
- Restructured recommendation logic to operate independently of UI and persistence layers, enabling **15 unit tests** covering ranking, classification, and edge cases.
- Designed and programmed a deterministic recommendation engine using ingredient coverage, expiration urgency, synonym normalization, and dish-pairing rules; evaluated its top-3 recommendations across **10 test inventories**.

TrustBin, AI Waste Classification | Next.js, TypeScript, Tailwind CSS, Supabase | *GitHub* **May 2026**
- Developed and launched a **full-stack waste-classification** application using Next.js, TypeScript, Supabase, and Claude Vision API, supporting camera capture and photo uploads.
- Reduced median scan-to-result latency by **60%, from 5 to 2 seconds**, by standardizing JSON responses, eliminating redundant state updates, and streamlining parsing.
- Standardized model responses into validated **JSON** containing waste category, material type, and confidence; assessed output consistency across **25 manually reviewed test images**. **[Hackathon]**

AI-Jurist, Legal Guidance Chatbot | Python, Llama 2, Hugging Face, Google Colab | *GitHub* **May 2024**
- Led a team of **3** to develop a chatbot providing plain-language guidance on Indian law, preparing a **3,000-row question-and-answer dataset** and fine-tuning Llama 2.
- Built a three-stage supervised fine-tuning pipeline using Hugging Face Transformers and SFT Trainer, increasing correct responses from **15/20 to 19/20** on a manually evaluated question set.

EXPERIENCE

Arizona PBS, Phoenix, AZ | **Digital Content Assistant** | Part-time **Apr 2026 - Oct 2026**
- Produced **3–5** broadcast-ready video segments weekly for television and social media, applying editorial quality standards to support consistent, on-time delivery.
- Organized **10+** media assets per segment, improving content accessibility and streamlining post-production workflows.

RESEARCH PUBLICATION

- Published the **AI-Jurist** research in **IJRAR (2024)**, documenting its system architecture, supervised fine-tuning pipeline, and manual evaluation methodology for a legal-domain LLM. Research Paper

LEADERSHIP

Head of Digital Media | ISTE Student Chapter, KJSIT, Mumbai, India **Sep 2022 - Aug 2023**
- Led a creative team of **5 students** to produce Instagram content for the ISTE student chapter.
